

BRIDGE WIDENING PAINS?

Save **TIME & MONEY** with our bridge widening & repair solution

Traditional Methods

Slow & Drains Money
Removes 50' of concrete a night

Chipping Hammer = Manual
More errors and unsafe.
Damages structural beam

Prone to Mistakes
Crew manually navigates around rebar,
girders, and armour joints

Hydrodemolition

Fast & Cost-Effective
Removes 150' of concrete a night

Fully Robotic = Automated
Safe and less prone to errors.
Protects structural beam

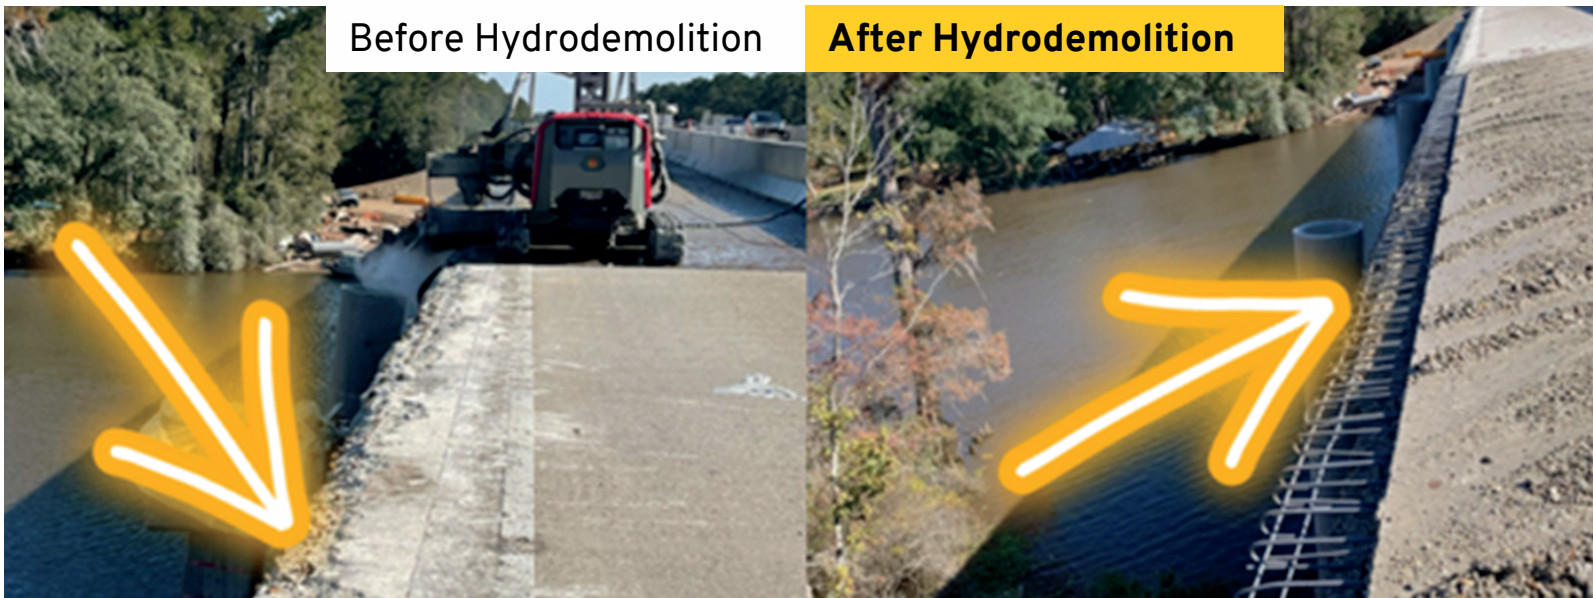

Precise & Efficient
Keeps rebar, girders, and armour joints
in tact, with little effort

HYDRODEMOLITION

Before Hydrodemolition

After Hydrodemolition

We are the leading hydrodemolition contractor in the United States
