

Revolutionizing Your Pile Cutting Projects: Faster, Safer, & More Efficient!

TURBO SWAP

LASER TECHNOLOGY

INTRODUCING: PCM₂

- ✓ **ATI-Exclusive Technology** – Cuts concrete, steel, & wood piles with or without holding, requiring only 4" ground clearance.
- ✓ **Unmatched Speed** – Up to 200 piles cut daily, helping you meet deadlines faster.
- ✓ **Cost-Effective & Safe** – Single-operator, in-cab control reduces labor costs, downtime, & operational expenses.
- ✓ **Versatile Applications** – Ideal for marine, bridge, infrastructure, LNG, and refinery projects.

NEW UPGRADES:

- ✓ **Seamless Excavator Integration** – Works with excavator computer, controls, hydraulics & roto-tilt manifold.
- ✓ **Enhanced Durability** – Fewer hydraulic failure points & upgraded blade shaft bearings for longer life.
- ✓ **Turbo Swap** – 5-minute head swap for less downtime & increased stability.

Precision Laser Technology – No More Guesswork!

- ✓ **Single surveyor mark needed per height** – saves time & reduces costs.
- ✓ **In-cab level detector** – ensures accurate, consistent cuts.
- ✓ **Adjustable for different pile heights** – eliminates surveyor wait time.
